SAFDAR AZAM

Java Backend Developer | Spring Boot | REST APIs | PostgreSQL

Bangalore, Karnataka | +91 6207274850 | safdarazam373@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on training in Core Java (8/11/17), Spring Boot, Spring Security, Spring Data JPA, Hibernate ORM, and RESTful API development. Experienced in designing secure, scalable server-side applications, managing PostgreSQL/MySQL databases, and following best coding and Agile practices. Strong foundation in OOPs, data structures, and SOLID design principles. Immediate joiner seeking a Backend Developer role.

TECHNICAL SKILLS

- Languages: Core Java (8/11/17), SQL, JavaScript, HTML5, CSS3
- Frameworks: Spring, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, JDBC, Servlets, REST API
- Databases: PostgreSQL, MySQL
- Tools: Git, GitHub, Maven, Postman, Swagger/OpenAPI, VS Code, Eclipse
- Concepts: OOPs, DSA, Collections Framework, Multithreading, Streams API, Exception Handling, JWT Authentication, BCrypt, RBAC, Microservices fundamentals

INTERNSHIP / TRAINING

Java Full Stack Development Training — JSpiders Training Institute, Bangalore Aug 2025 – May 2026

- Completed 9-month intensive training in Java Full Stack Development: Core Java, Advanced Java, Spring Boot, Hibernate, SQL, HTML, CSS, JavaScript.
- Built 3 full-stack web applications and REST APIs using Spring Boot, Spring Security, JWT authentication, and PostgreSQL/MySQL.
- Documented APIs with Swagger/OpenAPI 3.0; used Git with feature-branch workflow across all projects.

PROJECTS

MediCare AI — Healthcare Chatbot Platform | GitHub: MediCare-AI-Intelligent-Healthcare-Assistant

Java 17 | Spring Boot 3.2 | PostgreSQL | JWT | OpenAI/Gemini API | HTML | Tailwind CSS | JavaScript

- Built a full-stack healthcare chatbot application using Spring Boot 3.2 and Java 17 with PostgreSQL, integrating OpenAI/Gemini APIs to generate intelligent, context-aware responses.
- Implemented JWT-based authentication and role-based access control for Patient, Doctor, and Admin roles.
- Designed a responsive frontend with HTML, Tailwind CSS, and vanilla JavaScript, including a dark/light mode toggle.

EduSphere – Student Management System

Core Java | Servlets | JDBC | PostgreSQL | MVC | HTML5 | CSS3 | Git

GitHub: github.com/Safdar7262/EduSphere-Student-Management-System

- Developed a CRUD-based Student Management System using MVC architecture and JDBC PreparedStatements to prevent SQL injection; designed a normalized PostgreSQL schema with indexing for optimized query performance.
- Implemented search, filter, and server-side pagination for 500+ records; deployed on Apache Tomcat following Controller → Service → DAO layered architecture.

EDUCATION

B.Tech, Computer Science and Engineering — Rungta College of Engineering & Technology, Bhilai 2025 | CGPA: 8.1/10

PROBLEM SOLVING & DSA

- Solved 100+ problems on LeetCode and HackerRank in Java covering Arrays, Linked Lists, Trees, Graphs, and Dynamic Programming; proficient in Two Pointer, Sliding Window, Binary Search, Recursion, BFS/DFS, and Big-O analysis.

KEY STRENGTHS

Analytical Thinking • Quick Learner • Team Collaboration • Self-Motivated • Strong Communication • Agile/Scrum • Immediate Joiner
